DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21, 28-31 and 33-60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuslich (5,059,193).

Kuslich discloses the claimed invention including using in a surgical procedure a body 12 having axial walls 26 interconnected at their ends and an expansion member 16,20 co-acting with the walls to expand the body along a transverse axis (see, e.g., Fig. 1). The body comprises the axial walls that comprise a rectangular cross-section. The expansion member comprises a component of axial displacement along a longitudinal axis of the device. The inner surfaces of the walls are arcuate or tapered and accordingly comprise a concave recessed area for receiving the expansion member. The walls deform outwardly to form a convex outer curvature. An inner chamber 116 is accessible via openings between the walls. The chamber is filled with bone growth promoting substance (e.g. bone chips; see col. 8, lines 42-45). The central portion of the body has a width that is greater than that of the ends. Although Kuslich may not explicitly or unambiguously show that the expansion member is or may be at the claimed location, it is noted that it would have been obvious to one having ordinary

skill in the art at the time the invention was made to have located the expansion member intermediate pairs of opposite end portions and extending transversely between central portions of axial walls, for example, since it has been held that mere relocation of parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70. It would have likewise been obvious to have provided the bone growth promoting substance as bone morphogenic proteing (BMP), since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Claims 22-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuslich (5,059,193), as applied to claim 1 above, in view of Chauvin (6,371,989).

Kuslish, as modified, discloses the claimed invention except for explicitly reciting the teeth or grooves on the surface of the device. Chauvin et al. disclose a similar device comprising teeth or grooves 11 to provide anchoring in the bone and avoid subsequent migration (see, e.g. col. 5, lines 17-18). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided device of Kuslich with teeth or grooves, in view of Chauvin, in order to provide anchoring in the bone and avoid subsequent migration. At least some of the teeth would be confined to a central portion of the resulting structure. The grooves have an arcuate configuration.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
